

DOLAGRIND S 241

Milling agent

Chemical basis

Polyvalent alcohol

Characteristics

Appearance	white flakes
Active matter	approx. 100%
Solubility	soluble with water
Density (20 °C)	approx. 1.08g/cm ³
pH	approx. 6.5
Residue on ignition	max 0.01%
Bulk density	approx. 600kg/m ³

Shelf-life / Packaging

12 months if stored under proper conditions | Bags of 25 kg

Application

DOLAGRIND S 241 is a milling agent, which has been developed for the dry milling of ceramic raw materials, glazes, oxides and pigments.

The mill batch can be easily discharged without leaving residues, and the mill walls are free of any adhered material.

Owing to different compositions of the milling materials, the optimum addition quantity must be determined in preliminary tests.

Recommended addition rates are between 0.1% and 0.8%, calculated on dry matter.

The above results have been obtained from trials in our laboratory and plant.
In the light of changing conditions they can serve only as a guide and are therefore offered without obligation.
We ask you to observe the possible rights of third parties.
